

Havoline Motor Oil API SJ

Passenger Car Motor Oil

Product description

High quality, shear-stable, multigrade engine oil for use in a wide range of gasoline and gas fuelled (natural gas, LPG/CNG) engines passenger car and light-duty commercial vehicle engines where API SJ performance lubricants are required. It provides a high level of protection against starting friction, heat stress and engine deposits.

Customer benefits and product features

Customer benefits

- **Long engine life** - Proven metallo-organic anti-wear additive system resists wear under all operating conditions by forming a protective layer on contact surfaces. Multigrade viscosity provides additional protection against wear at start-up and under high temperature operating conditions as compared with monograde oils of similar performance. High thermal and oxidation resistance protects against CNG related valve deposits.
- **Preserves power and performance** - Metallic detergent and ashless dispersant additive system preserves power and performance by providing good control of piston and ring deposits under high temperature conditions.
- **Saves on maintenance** - Very good thermal and oxidation stability resists in-service oil degradation that contributes to filter blocking and sludge formation.

Applications

- Naturally aspirated and turbocharged gasoline engines in passenger cars where API SJ or lower performance oils are specified.
- Spark ignition engines fuelled with gas (CNG and LPG) or fitted with gas/ gasoline dual fuel systems in passenger cars or light commercial vehicles.
- Light truck gasoline engines where API SJ or lower performance oils are specified.
- Four-stroke gasoline engines in portable power equipment where the manufacturer recommends conventional passenger car motor oils of API SJ or lower performance.

Not recommended for use in diesel engines, motorcycle engines, or gasoline engines that require API SL or higher performance oils.

Product approvals, performance and recommendations

Performance

- API SJ
- Suitable for use also where API SG, SF or SE oils are specified.
