

# TALCOR® OGP-6

## Open Gear Lubricant

### Product description

Talcor® OGP-6 is an adhesive, Open Gear Lubricant free of bitumen, graphite, molybdenum disulphide and other heavy metals. Its highly refined base oils and stable synthetic thickeners, compounded together with high performance enhancing additives, provide a transparent lubricant film on the gear flanks.

### Customer benefits

Talcor® OGP-6 delivers value through:

- **Ease of maintenance** - Excellent adhesion on the gear flanks and easy drainage from gear guards. Transparent lubricant film makes it easy to inspect gear flanks.
- **Ease of application** - Can be dispensed without heating, through conventional spray lubricating systems.
- **Excellent wear protection** - Surpasses the scope of the FZG Test, thus providing excellent lubrication under boundary load conditions.
- **Stable chemistry** - Shear stable synthetic thickeners contribute to good mechanical stability whilst in service without packing in the gear teeth roots.

### Applications

- Talcor® OGP-6 is designed specifically to be used on exceptionally heavily-loaded, slow moving open gears that call for solid-free lubricant.
