Havoline[®] Motor Oil Extra API SL

Passenger Car Motor Oil

Product Description

Havoline[®] Motor Oil Extra is a high quality, shear-stable, multigrade engine oil for use in a wide range of passenger car and light-duty commercial vehicle gasoline engines where API SL performance lubricants are required. It provides a high level of protection against starting friction, heat stress and engine deposits.

Customer benefits

Long engine life

Proven metallo-organic anti-wear additive system resists wear under all operating conditions byforming a protective layer on contact surfaces. Multigrade viscosity provides additional protection against wear at start-up and under high temperature operating conditions as compared with monograde oils of similar performance.

• Preserves power and performance

Metallic detergent and ashless dispersant additive system preserves power and performance by providing good control of piston and ring deposits under high temperature conditions.

Saves on maintenance

Very good thermal and oxidation stability resists in-service oil degradation that contributes to filter blocking and sludge formation.

Applications

- Naturally aspirated and turbocharged gasoline engines in passenger cars where API SL or lower performance oils are specified.
- Light truck gasoline engines where API SL or lower performance oils are specified.
- Four-stroke gasoline engines in portable power equipment where the manufacturer recommends conventional passenger car motor oils of API SL or lower performance.
