## CNO process oils

### Product description

Texpar CNO process oils are a new generation of Group II-based process oils. They offer extremely low sulphur, nitrogen and aromatic content and are designed to provide good thermal and oxidation stability.

### Customer benefits

- Designed with improved oxidation and thermal stability
- Formulated for low aromatic property performance
- Offers good low temperature characteristics

### Applications

Texpar CNO process oils are widely used in the following applications:

- in the manufacturing of printing inks
- as a carrier for soluble oils
- as extenders/softeners for rubbers and plastics
- as a carrier for lubricant additives
- as an anti-dust oil for fertilisers and explosives
- as an impregnating oil
