

# Talcor Breakout Blue

Anti-seize compound

## Product description

**TALCOR BREAKOUT BLUE** is an anti-seize compound with a distinctive blue colour with its revolutionary technology, consisting of the new generation of stable anti-weld fillers, highly refined, high viscosity base stocks bound with a high melt complex thickener.

## Customer benefits and product features

- Contains no heavy metal fillers or heavy metal additives.
- Adhesive and cohesive properties ensure excellent adhesion, even in wet conditions, whilst helping to minimise fling-off.
- High drop point complex thickener provides excellent pumpability and good stability at high temperatures.
- Will not build up in thread roots, yet leaves sufficient coverage to help extend re-lubrication cycles.

## Applications

All drill rod, tubes and flanges that are constantly connected and disconnected, typical of the on-shore drilling industry.

*Note: Due to its chemical formulation Breakout Blue is not recommended for general purpose greasing.*

## Product approvals, performance and recommendations

- N/A

# Talcor Breakout Blue

Anti-seize compound

## Typical test data

TALCOR BREAKOUT BLUE KEY PROPERTIES	RESULTS
<b>NLGI Grade</b>	<b>1</b>
<b>Product Code</b>	<b>571390</b>
Thickener	Complex based
Dropping Point °C	265
Base Fluid Viscosity (cSt) @ 40°C	426.1
Safe Operating Temperature °C	152
Four Ball EP Test Weld Point (kgf)	400
