

# Safety Data Sheet

## SECTION 1 IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

### 1.1 Product identifier

#### Havoline Ultra SAE 5W-40

Product Number(s): 840310

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Identified Uses: Passenger Car Motor Oil

### 1.3 Details of the supplier of the safety data sheet

Chevron Products UK Limited  
1 Westferry Circus  
Canary Wharf  
London E14 4HA  
United Kingdom  
email : eumsds@chevron.com

### 1.4 Emergency telephone number

#### Transportation Emergency Response

Europe: 0044/(0)18 65 407333 and CHEMTREC: +1 703 527 3887

#### Health Emergency

Chevron Emergency Information Center: Located in the USA, international calls accepted 24 hours: +1 510 231 0623

Europe: 0044/(0)18 65 407333

#### Product Information

Product Information: FAX number: 0044/20 77 19 5171

## SECTION 2 HAZARDS IDENTIFICATION

### 2.1 Classification of the substance or mixture

#### CLP CLASSIFICATION:

Not classified as dangerous according to UK REACH regulation.

### 2.2 Label elements

Under the criteria of GB CLP:

Not classified

- contains: Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts. May produce an allergic reaction.

### 2.3 Other hazards

This material does not contain a substance considered to have endocrine disrupting properties at levels

of 0.1% weight or higher. This material does not contain a substance considered to be PBT or vPvB at levels of 0.1% weight or higher.

### SECTION 3 COMPOSITION/ INFORMATION ON INGREDIENTS

#### 3.2 Mixtures

This material is a mixture.

COMPONENTS	CAS NUMBER	EC NUMBER	REGISTRATION NUMBER	GB CLP CLASSIFICATION	AMOUNT
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	72623-87-1	276-738-4	UK-01-4928070641-X-XXXX	None	35 - 60 %weight
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	72623-87-1	276-738-4	UK-01-4928070641-X-XXXX	Asp. Tox. 1/H304	20 - 35 %weight
Distillates, hydrotreated heavy paraffinic	64742-54-7	265-157-1	UK-01-1759217276-5, UK-20-0823962999-X-XXXX	None	1 - 5 %weight
Lubricating oils, hydrotreated C15-30, neutral oil-based	72623-86-0	276-737-9	UK-01-6260983107-X-XXXX	Asp. Tox. 1/H304	1 - 5 %weight
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	68784-31-6	272-238-5	UK-01-7503503719-3	Aquatic Chronic 2/H411; Eye Dam. 1/H318	1 - 2 %weight
Reaction products of diphenylamine with nonene, branched	Not applicable	701-385-4	UK-01-6387653799-2	Repr. 2/H361f	0.1 - < 1 %weight
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts	722503-68-6	682-816-2	**	Skin Sens. 1B/H317	0.1 - < 1 %weight
(Tetrapropenyl)succinic acid	27859-58-1	248-698-8	UK-01-6545592527-4	Eye Dam. 1/H318; Repr. 2/H361d; Skin Corr. 1C/H314; STOT RE 2/H373	0.1 - < 1 %weight

The full text of all CLP H-statements is shown in Section 16.

In accordance with reference IP 346/92: "DMSO Extraction Method", we have determined that the base oils used in this preparation contain <3% DMSO extract and are not carcinogenic.

\*\*Not available or substance is not currently required for registration under UK REACH.

†† Internally derived Specific Concentration Limit's (SCL) of C>2% or C>4% have been established for ZnDTPs dependent on the product type they are present in. Please confirm with Chevron which SCL value is appropriate for use in classification.

### SECTION 4 FIRST AID MEASURES

#### 4.1 Description of first aid measures

**Eye:** No specific first aid measures are required. As a precaution, remove contact lenses, if worn, and flush eyes with water.

**Skin:** No specific first aid measures are required. As a precaution, remove clothing and shoes if contaminated. To remove the material from skin, use soap and water. Discard contaminated clothing and shoes or thoroughly clean before reuse.

**Ingestion:** No specific first aid measures are required. Do not induce vomiting. As a precaution, get medical advice.

**Inhalation:** No specific first aid measures are required. If exposed to excessive levels of material in the air, move the exposed person to fresh air. Get medical attention if coughing or respiratory discomfort occurs. If exposure to hydrogen sulfide (H<sub>2</sub>S) gas is possible during an emergency, wear an approved, positive pressure air-supplying respirator. Move the exposed person to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get immediate medical attention.

#### **4.2 Most important symptoms and effects, both acute and delayed**

##### **IMMEDIATE SYMPTOMS AND HEALTH EFFECTS**

**Eye:** Not expected to cause prolonged or significant eye irritation.

**Skin:** Contact with the skin is not expected to be harmful.

**Ingestion:** Not expected to be harmful if swallowed.

**Inhalation:** Not expected to be harmful if inhaled. Contains a petroleum-based mineral oil. May cause respiratory irritation or other pulmonary effects following prolonged or repeated inhalation of oil mist at airborne levels above the recommended mineral oil mist exposure limit. Symptoms of respiratory irritation may include coughing and difficulty breathing. Hydrogen sulfide has a strong rotten-egg odor. However, with continued exposure and at high levels, H<sub>2</sub>S may deaden a person's sense of smell. If the rotten egg odor is no longer noticeable, it may not necessarily mean that exposure has stopped. At low levels, hydrogen sulfide causes irritation of the eyes, nose, and throat. Moderate levels can cause headache, dizziness, nausea, and vomiting, as well as coughing and difficulty breathing. Higher levels can cause shock, convulsions, coma, and death. After a serious exposure, symptoms usually begin immediately.

**DELAYED OR OTHER SYMPTOMS AND HEALTH EFFECTS:** Not classified.

#### **4.3 Indication of any immediate medical attention and special treatment needed**

**Note to Physicians:** Administration of 100% oxygen and supportive care is the preferred treatment for poisoning by hydrogen sulfide gas. For additional information on H<sub>2</sub>S, see Chevron SDS No. 301.

### **SECTION 5 FIRE FIGHTING MEASURES**

#### **5.1 Extinguishing media**

Use water fog, foam, dry chemical or carbon dioxide (CO<sub>2</sub>) to extinguish flames.

#### **5.2 Special hazards arising from the substance or mixture**

**Combustion Products:** Highly dependent on combustion conditions. A complex mixture of airborne solids, liquids, and gases including carbon monoxide, carbon dioxide, and unidentified organic compounds will be evolved when this material undergoes combustion. Combustion may form oxides of: Nitrogen, Phosphorus, Sulfur, Zinc .

#### **5.3 Advice for firefighters**

This material will burn although it is not easily ignited. See Section 7 for proper handling and storage. For fires involving this material, do not enter any enclosed or confined fire space without proper protective equipment, including self-contained breathing apparatus.

### **SECTION 6 ACCIDENTAL RELEASE MEASURES**

#### **6.1 Personal precautions, protective equipment and emergency procedures**

Observe all relevant local and international regulations. Eliminate all sources of ignition in vicinity of spilled material. Keep out unnecessary and unprotected personnel. Persons entering the contaminated area to correct the problem or to determine whether it is safe to resume normal activities must comply

with all instructions in the Exposure Controls/Personal Protection section. Refer to Sections 5 and 8 for more information.

### 6.2 Environmental precautions

Stop the source of the release if you can do it without risk. Contain release to prevent further contamination of soil, surface water or groundwater.

### 6.3 Methods and material for containment and cleaning up

Clean up spill as soon as possible, observing precautions in Exposure Controls/Personal Protection. Use appropriate techniques such as applying non-combustible absorbent materials or pumping. Where feasible and appropriate, remove contaminated soil and dispose of in a manner consistent with applicable requirements. Place other contaminated materials in disposable containers and dispose of in a manner consistent with applicable requirements. Report spills to local authorities as appropriate or required.

### 6.4 Reference to other sections

See sections 8 and 13.

## SECTION 7 HANDLING AND STORAGE

### 7.1 Precautions for safe handling

**General Handling Information:** Avoid contaminating soil or releasing this material into sewage and drainage systems and bodies of water.

**Precautionary Measures:** Do not get in eyes, on skin, or on clothing. Do not taste or swallow. Do not breathe gas. Wash thoroughly after handling.

**Unusual Handling Hazards:** Toxic quantities of hydrogen sulfide (H<sub>2</sub>S) may be present in storage tanks and bulk transport vessels which contain or have contained this material. Persons opening or entering these compartments should first determine if H<sub>2</sub>S is present. See Exposure Controls/Personal Protection -Section 8. Do not attempt rescue of a person over exposed to H<sub>2</sub>S without wearing approved supplied-air or self-contained breathing equipment. If there is a potential for exceeding one-half the occupational exposure standard, monitoring of hydrogen sulfide levels is required. Since the sense of smell cannot be relied upon to detect the presence of H<sub>2</sub>S, the concentration should be measured by the use of fixed or portable devices.

**Static Hazard:** Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary but may not, by themselves, be sufficient. Review all operations which have the potential of generating and accumulating an electrostatic charge and/or a flammable atmosphere (including tank and container filling, splash filling, tank cleaning, sampling, gauging, switch loading, filtering, mixing, agitation, and vacuum truck operations) and use appropriate mitigating procedures.

**Container Warnings:** Container is not designed to contain pressure. Do not use pressure to empty container or it may rupture with explosive force. Empty containers retain product residue (solid, liquid, and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. They may explode and cause injury or death. Empty containers should be completely drained, properly closed, and promptly returned to a drum reconditioner or disposed of properly.

### 7.2 Conditions for safe storage, including any incompatibilities

Not Applicable

### 7.3 Specific end use(s): Passenger Car Motor Oil

## SECTION 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

### GENERAL CONSIDERATIONS:

Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the workplace when designing engineering controls and selecting personal protective equipment (PPE). If engineering controls or work practices are not adequate to prevent

exposure to harmful levels of this material, refer to PPE information below.

Factors that affect PPE include, but are not limited to: properties of the chemical, other chemicals which may contact the same PPE, physical requirements (fit & sizing, cut/puncture protection, dexterity, thermal protection, etc.), and potential allergic reactions to the PPE material. It is the responsibility of the user to read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances. Refer to appropriate CEN standards.

### 8.1 Control parameters

**Occupational Exposure Limits:** No applicable occupational exposure limits exist for this material or its components. Consult local authorities for appropriate values.

### 8.2 Exposure controls

#### ENGINEERING CONTROLS:

Use in a well-ventilated area.

### PERSONAL PROTECTIVE EQUIPMENT

**Eye/Face Protection:** Wear protective equipment to prevent eye contact. Selection of protective equipment may include safety glasses, chemical goggles, face shields, or a combination depending on the work operations conducted.

**Skin Protection:** Wear chemical personal protective equipment (PPE) to prevent skin contact. Selection of chemical protective clothing should be performed by an Occupational Hygienist or Safety Professional and be based upon applicable standards (ASTM F739 or EN 374). Using chemical PPE depends upon operations conducted and may include chemical gloves, boots, chemical apron, chemical suit, and complete facial protection. **Refer to PPE manufacturers to obtain breakthrough time information to determine how long PPE can be used before it needs to be replaced.** Unless specific glove manufacturer data indicates otherwise, the below table is based upon available industry data to assist in the glove selection process and is intended to be used as reference only.

Chemical Glove Material	Thickness (mm)	Typical Breakthrough Time (minutes)
Butyl	0.7	120
Neoprene	0.61	120
Nitrile	0.8	120
Polyvinyl Chloride (PVC)	1.1	120
Viton Butyl	0.3	120

**Respiratory Protection:** A site-specific risk assessment should be conducted by an Occupational Hygienist or a Safety Professional to determine the type and use of respiratory protective equipment. When a site-specific risk assessment determines that respiratory protection is required, use an approved respirator such as:

#### Air purifying respirator -

If airborne concentration limits exceed the applicable occupational exposure limit, but are below the maximum use concentration.

Vapors only: organic vapor cartridge (filter type A3 per EN 529:2005).

Vapors and particulates (including generated mists): both an organic vapor cartridge & particulate filter (AP3 filter per EN 529:2005).

Refer to respirator manufacturers to obtain service life of cartridge / filter.

#### Positive pressure air-supplying respirator -

If airborne concentration limits exceed the maximum use concentration offered from an air purifying respirator.

If hydrogen sulfide (H<sub>2</sub>S) airborne concentrations exceed its applicable occupational exposure limits due to this material being heated. For more information on H<sub>2</sub>S, see Chevron SDS 301.

Refer to EN 529:2005, USA OSHA 1910.134, and/or other applicable local/regional/national/international standards for regulatory requirements.

#### **ENVIRONMENTAL EXPOSURE CONTROLS:**

See relevant Community environmental protection legislation or the Annex, as applicable.

### **SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES**

**Attention: the data below are typical values and do not constitute a specification.**

#### **9.1 Information on basic physical and chemical properties**

##### **Appearance**

**Color:** Brown to yellow

**Physical State:** Liquid

**Odor:** Petroleum odor

**Odor Threshold:** No data available

**pH:** Not Applicable

**Melting Point:** No data available

**Freezing Point:** Not Applicable

**Initial Boiling Point:** No data available

**Flashpoint:** (Cleveland Open Cup) 210 °C (410 °F) (Minimum)

**Evaporation Rate:** No data available

**Flammability (solid, gas):** Not Applicable

**Flammability (Explosive) Limits (% by volume in air):**

Lower: No data available Upper: No data available

**Vapor Pressure:** No data available

**Relative Vapor Density:** No data available

**Density:** 0.853 kg/l @ 15°C (59°F) (Typical)

**Solubility:** Soluble in hydrocarbons; insoluble in water

**Partition coefficient n-octanol/water (logarithmic value):** No data available

**Auto-ignition temperature:** No data available

**Decomposition temperature:** No data available

**Kinematic Viscosity:** 83.6 mm<sup>2</sup>/s @ 40°C (104°F) (Typical)

**Explosive Properties:** No Data Available

**Oxidising properties:** No Data Available

**9.2 Other Information:** No Data Available

### **SECTION 10 STABILITY AND REACTIVITY**

**10.1 Reactivity:** May react with strong acids or strong oxidizing agents, such as chlorates, nitrates, peroxides, etc.

**10.2 Chemical Stability:** This material is considered stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.

**10.3 Possibility of hazardous reactions:** Hazardous polymerization will not occur.

**10.4 Conditions to Avoid:** Not applicable

**10.5 Incompatible materials to avoid:** Not applicable

**10.6 Hazardous decomposition products:** Alkyl Mercaptans (Elevated temperatures), Hydrogen Sulfide (Elevated temperatures)

### **SECTION 11 TOXICOLOGICAL INFORMATION**

#### **11.1 Information on hazard classes**

**Product Information:**

**Serious Eye Damage/Irritation:** The material is not considered an eye irritant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

**Skin Corrosion/Irritation:** The material is not considered a skin irritant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

**Skin Sensitization:** The material is not considered a skin sensitizer. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

**Acute Dermal Toxicity:** The material is not considered a dermal toxicant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

**Acute Toxicity Estimate (dermal):** Not Applicable

**Acute Oral Toxicity:** The material is not considered an oral toxicant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

**Acute Toxicity Estimate (oral):** Not Applicable

**Acute Inhalation Toxicity:** The material is not considered an inhalation toxicant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

**Acute Toxicity Estimate (inhalation):** Not Applicable

**Germ Cell Mutagenicity:** The material is not considered a mutagen. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

**Carcinogenicity:** The material is not considered a carcinogen. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

**Reproductive Toxicity:** The material is not considered a reproductive toxicant. The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

**Specific Target Organ Toxicity - Single Exposure:** The material is not considered a target organ toxicant (single exposure). The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

**Specific Target Organ Toxicity - Repeated Exposure:** The material is not considered a target organ toxicant (repeated exposure). The product has not been tested. The statement is based on evaluation of data for similar materials or product components.

**Aspiration Hazard:** The material is not considered an aspiration hazard.

#### Component Information:

<b>Serious Eye Damage/Irritation:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	Test Result: Causes serious eye damage * read-across data from similar material
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs.,	Based on available data, the classification criteria are not met

calcium salts	
(Tetrapropenyl)succinic acid	Test Result: Causes serious eye damage
Reaction products of diphenylamine with nonene, branched	Based on available data, the classification criteria are not met

<b>Skin Corrosion/Irritation:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	Based on available data, the classification criteria are not met
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts	Based on available data, the classification criteria are not met
(Tetrapropenyl)succinic acid	Protocol: OECD 404 - Dermal Irritation/Corrosion Test Result: Causes severe skin burns and eye damage
Reaction products of diphenylamine with nonene, branched	Based on available data, the classification criteria are not met

<b>Skin Sensitization:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	Based on available data, the classification criteria are not met
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts	Test Result: May cause allergic skin reaction * read-across data from similar material
(Tetrapropenyl)succinic acid	Based on available data, the classification criteria are not met
Reaction products of diphenylamine with nonene, branched	Based on available data, the classification criteria are not met

<b>Acute Dermal Toxicity:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	Based on available data, the classification criteria are not met
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs.,	Based on available data, the classification criteria are not met

calcium salts	
(Tetrapropenyl)succinic acid	Based on available data, the classification criteria are not met
Reaction products of diphenylamine with nonene, branched	Based on available data, the classification criteria are not met

<b>Acute Oral Toxicity:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	Based on available data, the classification criteria are not met
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts	Based on available data, the classification criteria are not met
(Tetrapropenyl)succinic acid	Based on available data, the classification criteria are not met
Reaction products of diphenylamine with nonene, branched	Based on available data, the classification criteria are not met

<b>Acute Inhalation Toxicity:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	Based on available data, the classification criteria are not met
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts	Based on available data, the classification criteria are not met
(Tetrapropenyl)succinic acid	Based on available data, the classification criteria are not met
Reaction products of diphenylamine with nonene, branched	Based on available data, the classification criteria are not met

<b>Germ Cell Mutagenicity:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	Based on available data, the classification criteria are not met
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts	Based on available data, the classification criteria are not met
(Tetrapropenyl)succinic acid	Based on available data, the classification criteria are not met

Reaction products of diphenylamine with nonene, branched	Based on available data, the classification criteria are not met
--	--

<b>Carcinogenicity:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	Based on available data, the classification criteria are not met
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts	Based on available data, the classification criteria are not met
(Tetrapropenyl)succinic acid	Based on available data, the classification criteria are not met
Reaction products of diphenylamine with nonene, branched	Based on available data, the classification criteria are not met

<b>Reproductive Toxicity:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	Based on available data, the classification criteria are not met
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts	Based on available data, the classification criteria are not met
(Tetrapropenyl)succinic acid	Protocol: OECD 414 - Teratogenicity Test Result: Suspected of damaging fertility or the unborn child if ingested based on animal data
Reaction products of diphenylamine with nonene, branched	Test Result: Suspected of damaging fertility or the unborn child

<b>Specific Target Organ Toxicity - Single Exposure:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	Based on available data, the classification criteria are not met
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts	Based on available data, the classification criteria are not met
(Tetrapropenyl)succinic acid	Based on available data, the classification criteria are not met

Reaction products of diphenylamine with nonene, branched	Based on available data, the classification criteria are not met
--	--

<b>Specific Target Organ Toxicity - Repeated Exposure:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	Based on available data, the classification criteria are not met
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts	Based on available data, the classification criteria are not met
(Tetrapropenyl)succinic acid	Test Result: May cause damage to organs through prolonged and repeated exposure
Reaction products of diphenylamine with nonene, branched	Based on available data, the classification criteria are not met

#### **ADDITIONAL TOXICOLOGY INFORMATION:**

During use in engines, contamination of oil with low levels of cancer-causing combustion products occurs. Used motor oils have been shown to cause skin cancer in mice following repeated application and continuous exposure. Brief or intermittent skin contact with used motor oil is not expected to have serious effects in humans if the oil is thoroughly removed by washing with soap and water.

#### **11.2 Information on other hazards**

This material does not contain a substance considered to have endocrine disrupting properties at levels of 0.1% weight or higher.

### **SECTION 12 ECOLOGICAL INFORMATION**

#### **Product Information:**

##### **12.1 Toxicity**

This material is not expected to be harmful to aquatic organisms. The product has not been tested. The statement has been derived from the properties of the individual components.

##### **12.2 Persistence and degradability**

This material is not expected to be readily biodegradable. The product has not been tested. The statement has been derived from the properties of the individual components.

##### **12.3 Bioaccumulative potential**

Bioconcentration Factor: No Data Available

Partition coefficient n-octanol/water (logarithmic value): No data available

##### **12.4 Mobility in soil**

No data available.

##### **12.5 Results of PBT and vPvB assessment**

This material does not meet the criteria for PBT or vPvB.

##### **12.6 Endocrine Disrupting Properties**

This mixture does not contain any substances that are assessed as having endocrine disrupting properties.

##### **12.7 Other adverse effects**

No other adverse effects identified.

**Component Information:**

<b>Acute Toxicity:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	Test Qualifier: EC50 Test Result: 1.2 mg/l Species: Invertebrate Duration:48 hour(s) * read-across data from similar material
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts	Based on available data, the classification criteria are not met
(Tetrapropenyl)succinic acid	Based on available data, the classification criteria are not met
Reaction products of diphenylamine with nonene, branched	Based on available data, the classification criteria are not met

<b>Long-term Toxicity:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	No test data available
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts	Based on available data, the classification criteria are not met
(Tetrapropenyl)succinic acid	Based on available data, the classification criteria are not met
Reaction products of diphenylamine with nonene, branched	Based on available data, the classification criteria are not met

<b>Biodegradation:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	Test Result: Not readily biodegradable
Reaction products of diphenylamine with nonene, branched	Based on available data, the classification criteria are not met
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts	Based on available data, the classification criteria are not met
(Tetrapropenyl)succinic acid	Based on available data, the classification criteria are not met

<b>Bioaccumulative Potential:</b>	
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, petroleum, C20-50, hydrotreated neutral oil-based	Based on available data, the classification criteria are not met
Lubricating oils, hydrotreated C15-30, neutral oil-based	Based on available data, the classification criteria are not met
Distillates, hydrotreated heavy paraffinic	Based on available data, the classification criteria are not met
Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts††	No test data available
Reaction products of diphenylamine with nonene, branched	Based on available data, the classification criteria are not met
Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts	Based on available data, the classification criteria are not met
(Tetrapropenyl)succinic acid	Based on available data, the classification criteria are not met

## **SECTION 13 DISPOSAL CONSIDERATIONS**

### **13.1 Waste treatment methods**

Use material for its intended purpose or recycle if possible. Oil collection services are available for used oil recycling or disposal. Place contaminated materials in containers and dispose of in a manner consistent with applicable regulations. Contact your sales representative or local environmental or health authorities for approved disposal or recycling methods.

In accordance with European Waste Catalogue (E.W.C.) the codification is the following: 13 02 05

## **SECTION 14 TRANSPORT INFORMATION**

The description shown may not apply to all shipping situations. Consult appropriate Dangerous Goods Regulations for additional description requirements (e.g., technical name) and mode-specific or quantity-specific shipping requirements.

### **ADR/RID**

NOT REGULATED AS DANGEROUS GOODS FOR TRANSPORT

- 14.1 UN Number or ID Number:** Not applicable
- 14.2 UN proper shipping name:** Not applicable
- 14.3 Transport hazard class(es):** Not applicable
- 14.4 Packing group:** Not applicable
- 14.5 Environmental hazards:** Not applicable
- 14.6 Special precautions for user:** Not applicable

### **ADN**

NOT REGULATED AS DANGEROUS GOODS FOR TRANSPORT

- 14.1 UN Number or ID Number:** Not applicable
- 14.2 UN proper shipping name:** Not applicable
- 14.3 Transport hazard class(es):** Not applicable
- 14.4 Packing group:** Not applicable
- 14.5 Environmental hazards:** Not applicable
- 14.6 Special precautions for user:** Not applicable

### **ICAO / IATA**

NOT REGULATED AS DANGEROUS GOODS FOR TRANSPORT

- 14.1 UN Number or ID Number: Not applicable
- 14.2 UN proper shipping name: Not applicable
- 14.3 Transport hazard class(es): Not applicable
- 14.4 Packing group: Not applicable
- 14.5 Environmental hazards: Not applicable
- 14.6 Special precautions for user: Not applicable

#### IMO / IMDG

NOT REGULATED AS DANGEROUS GOODS FOR TRANSPORT

- 14.1 UN Number or ID Number: Not applicable
- 14.2 UN proper shipping name: Not applicable
- 14.3 Transport hazard class(es): Not applicable
- 14.4 Packing group: Not applicable
- 14.5 Environmental hazards: Not applicable
- 14.6 Special precautions for user: Not applicable
- 14.7 Maritime Transport in Bulk according to IMO Instruments: Not applicable

### SECTION 15 REGULATORY INFORMATION

#### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture REGULATORY LISTS SEARCHED:

- 01=EU Directive 92/85/EEC: Pregnant or breastfeeding workers.
- 02=EU Directive 2012/18/EU: Seveso III.
- 03=EU Directive 98/24/EC: Chemical agents at work.
- 04=EU Directive 2004/37/EC: On the protection of workers.
- 05=EU Regulation EC No. 689/2008: Annex 1, Part 1.
- 06=EU Regulation EC No. 850/2004: Prohibiting and restricting persistent organic pollutants (POPs).
- 07=EU REACH, Annex XVII: Restrictions on manufacture, placing on the market and use of certain dangerous substances, mixture & article.
- 08=EU REACH, Annex XIV: Authorization List or Candidate List of Substances of Very High Concern for Authorization (SVHC).

No components of this material were found on the regulatory lists above.

#### CHEMICAL INVENTORIES:

All components comply with the following chemical inventory requirements: AIIC (Australia), DSL (Canada), EINECS (European Union), NZIoC (New Zealand), TSCA (United States).

One or more components does not comply with the following chemical inventory requirements: ENCS (Japan), PICCS (Philippines).

#### 15.2 Chemical safety assessment

No chemical safety assessment.

### SECTION 16 OTHER INFORMATION

**REVISION STATEMENT:** SECTION 02.2 - Hazardous Component Identification List information was added.

SECTION 03 - Composition information was added.

SECTION 03 - Composition information was modified.

SECTION 04 - First Aid - Inhalation information was modified.

SECTION 04 - First Aid - Note to Physicians information was added.

SECTION 04 - Immediate Health Effects - Inhalation information was modified.

SECTION 05 - Fire Fighters Protection Measures information was modified.

SECTION 05 - Special hazards arising from the substance or mixture information was added.

SECTION 07 - Precautionary Measures information was modified.  
 SECTION 07 - Unusual Handling Hazards information was added.  
 SECTION 08 - Occupational Exposure Limit Table information was deleted.  
 SECTION 08 - Personal Protective Equipment information was modified.  
 SECTION 08 - Respiratory Protection information was modified.  
 SECTION 10 - Hazardous Decomposition Products information was modified.  
 SECTION 11 - Toxicological Information information was modified.  
 SECTION 11.2 - Other Hazards information was modified.  
 SECTION 12 - Ecological Information information was modified.  
 SECTION 14 - ADN Classification information was added.  
 SECTION 15 - Chemical Inventories information was modified.  
 SECTION 16 - Full Text of H-Statements information was modified.

**Revision Date:** February 23, 2026

**Full text of CLP H-statements:**

Asp. Tox. 1/H304; May be fatal if swallowed and enters airways  
 Aquatic Chronic 2/H411; Toxic to aquatic life with long lasting effects  
 Eye Dam. 1/H318; Causes serious eye damage  
 Repr. 2/H361d; Suspected of damaging the unborn child  
 Repr. 2/H361f; Suspected of damaging fertility  
 Skin Sens. 1/H317; May cause an allergic skin reaction  
 Skin Corr. 1C/H314; Causes severe skin burns and eye damage  
 STOT RE 2/H373; May cause damage to organs through prolonged or repeated exposure

**ABBREVIATIONS THAT MAY HAVE BEEN USED IN THIS DOCUMENT:**

TLV - Threshold Limit Value	TWA - Time Weighted Average
STEL - Short-term Exposure Limit	PEL - Permissible Exposure Limit
CVX - Chevron	CAS - Chemical Abstract Service Number
NQ - Not Quantifiable	

Prepared according to the UK REACH by Chevron.
